This is what I listed for STA tower location:

ASRN: 1036004

Latitude: N 38° 22 ' 58 "
Longitude: W 75° 18 ' 58 "

I think this must have occurred because you checked "Licensed Antenna System" and "Other variance", instead of "Other antenna system". Dale

This data is not appearing in the online version of the STA filing that I can see. Can you e-mail me the information? Then I can take a new look at the filing.

Mr. Klepac:

Your request for Special Temporary Authority (STA), filed September 18, 2019, is DISMISSED without consideration. The STA request contains no technical information - coordinates, antenna heights, power, directional antenna pattern, and the like - and without this information, we cannot determine the impact of this operation on other licensees. Nor can we conclude that the proposed installation would comply with the Commission's environmental and radiofrequency exposure standards.

You are welcome to file a new STA request containing these parameters, and we will promptly consider your request. You may want to retain a broadcast consulting engineer to help you with preparing this material. Until then, the station cannot be legally operated with other than the licensed facilities.

This e-mail is sent to notify you soonest of our determination, and replaces the letter that would normally be sent for the same purpose.
